

Erratum: A unified slip-transpiration framework for NePCM flow over deforming boundaries

3724

It has come to the attention of the publisher that the article, Usafzai, W.K., Hussain, S., Emon, M.N.H. and Arifin, N.M. (2026), “A unified slip-transpiration framework for NePCM flow over deforming boundaries”, *International Journal of Numerical Methods for Heat & Fluid Flow*, <https://doi.org/10.1108/HFF-01-2026-0119>, contained errors introduced during the production process.

During typesetting, a formatting error resulted in the incorrect insertion of a symbol in the abstract. In addition, a number of corrections requested by the authors at the proof stage were not fully implemented prior to publication.

These errors have now been corrected. The publisher apologises for any inconvenience caused.
