12th International Congress on the Chemistry of Cement

The 12th ICCC will be held at the Palais des Congres in Montreal, Canada from 8–13 July 2007. The event will be co-hosted by the National Research Council (Canada), the Institute for Research & Construction and the Cement Association of Canada. The Congress will cover all aspects of cement science including hydration chemistry, structure of cement systems, characterisation techniques, sustainable development and climate change initiatives, durability and degradation innovations in cement and concrete science, rheology and early age properties, standards and the impact of research and other materials science aspects; the exact thematic areas are still being defined.

It is expected that a formal call for papers will be made in September 2005. Further information can be found on the website (www.iccc2007.org) or from the Management Office, National Research Council of Canada (ICCC 2007 Management Office), 1200 Montreal Road, Building M19, Ottawa, K1A 0R6, Canada.
