

Proceedings of the Institution of Civil Engineers 2006: Engineering Sustainability, vol. 159

Subject index

Codes of practice & standards

New ICE Sustainability Protocol. *Briefing*. Parry T.

Dec., 136

Procurement of ethical construction products. Mustow S. E.

Mar., 11–21

Concrete structures

Optimum design of sustainable concrete pavements. Hughes B. P.

Sept., 127–132

Design methods & aids

Creating walkable urban environments. Barnett S. Sept., 91–97

Widening engineering horizons: addressing the complexity of

sustainable development. Fenner R. A., Ainger C. M.,

Cruikshank H. J. and Guthrie P. M. Dec., 145–154

Developing countries

Sustainable landslide risk reduction in poorer countries.

Anderson M. G. and Holcombe L. Mar., 23–30

Sustainable supply chains for rural water supplies in Africa.

Harvey P. A. and Reed R. A. Mar., 31–39

Sustainable water—lessons from the developing world.

Wong K.-F. S. June, 55–62

Transport, mobility and social capital in developing countries.

Bradbury A. S. C. June, 79–86

Drainage & irrigation

Decision-support tools for sustainable drainage. Scholz M. Sept.,

117–125

Economics & finance

From 'securing' to 'procuring' our future. *Briefing*. Leiper Q. and

Pepper C. Dec., 137–138

Embankments

Banked realignment: a case study from the Humber Estuary, UK.

Pontee N. I., Hull S. C. and Moore J. R. Sept., 99–108

Environment

Decision-support tools and the indigenous paradigm.

Morgan T. K. K. B. Dec., 169–177

Decision-support tools for sustainable drainage. Scholz M. Sept.,

117–125

Engineering at the Centre for Alternative Technology. Brown K.

June, 49–53

From 'securing' to 'procuring' our future. *Briefing*. Leiper Q. and

Pepper C. Dec., 137–138

Procurement of ethical construction products. Mustow S. E. Mar.,

11–21

Field testing & monitoring

Sustainability evaluation for brownfield redevelopment.

Pediaditi K., Wehrmeyer W. and Chenoweth J.

Mar., 3–10

Floods & floodworks

Banked realignment: a case study from the Humber Estuary, UK.

Pontee N. I., Hull S. C. and Moore J. R. Sept., 99–108

Geotechnical engineering

Sustainable landslide risk reduction in poorer countries.

Anderson M. G. and Holcombe L. Mar., 23–30

Infrastructure planning

Sustainable transport policies under scarcity of oil supply.

Shepherd S. P. and Pfaffenbichler P. June, 63–70

Widening engineering horizons: addressing the complexity of

sustainable development. Fenner R. A., Ainger C. M.,

Cruikshank H. J. and Guthrie P. M. Dec., 145–154

Land reclamation

Sustainable regeneration of former Mackies site, Belfast.

Dunlop J. Sept., 109–116

Management

Sustainable water—lessons from the developing world.

Wong K.-F. S. June, 55–62

Mathematical modelling

Sustainable transport policies under scarcity of oil supply.

Shepherd S. P. and Pfaffenbichler P. June, 63–70

Municipal & public service engineering

Decision-support tools and the indigenous paradigm.

Morgan T. K. K. B. Dec., 169–177

Pavement design

Optimum design of sustainable concrete pavements. Hughes B. P.

Sept., 127–132

Power stations (non-fossil fuel)

Hydroelectric power without water storage. Shaw T. L. Dec.,

139–143

Railway systems

Benefits of an Edinburgh–Newcastle high-speed rail link.

Edwards J. June, 71–78

Recycling of materials

Sustainable regeneration of former Mackies site, Belfast.

Dunlop J. Sept., 109–116

Research & development

Engineering at the Centre for Alternative Technology. Brown K.

June, 49–53

Roads & highways

Optimum design of sustainable concrete pavements. Hughes B. P.

Sept., 127–132

Sea defences

Banked realignment: a case study from the Humber Estuary, UK.
Pontee N. I., Hull S. C. and Moore J. R. Sept., 99–108

Social impact

Decision-support tools and the indigenous paradigm.
Morgan T. K. K. B. Dec., 169–177

New ICE Sustainability Protocol. *Briefing*. Parry T. Dec., 136

Procurement of ethical construction products. Mustow S. E. Mar.,
11–21

Sustainability evaluation for brownfield redevelopment.

Pediaditi K., Wehrmeyer W. and Chenoweth J. Mar., 3–10

Transport, mobility and social capital in developing countries.

Bradbury A. S. C. June, 79–86

Widening engineering horizons: addressing the complexity of
sustainable development. Fenner R. A., Ainger C. M.,

Cruickshank H. J. and Guthrie P. M. Dec., 145–154

Town & city planning

Creating walkable urban environments. Barnett S. Sept., 91–97

Decision-support tools for sustainable drainage. Scholz M. Sept.,
117–125

Traffic engineering

Creating walkable urban environments. Barnett S. Sept., 91–97

Transport planning

Benefits of an Edinburgh–Newcastle high-speed rail link.

Edwards J. June, 71–78

Sustainable transport policies under scarcity of oil supply.

Shepherd S. P. and Pfaffenbichler P. June, 63–70

Transport, mobility and social capital in developing countries.

Bradbury A. S. C. June, 79–86

Urban regeneration

Sustainability evaluation for brownfield redevelopment.

Pediaditi K., Wehrmeyer W. and Chenoweth J. Mar.,

3–10

Sustainable energy? A feasibility study for Eastside, Birmingham,

UK. Hunt D. V. L., Jefferson I., Jankovic L. and Hunot K. Dec.,

155–168

Waste management & disposal

Sustainable regeneration of former Mackies site, Belfast.

Dunlop J. Sept., 109–116

Water supply

Sustainable supply chains for rural water supplies in Africa.

Harvey P. A. and Reed R. A. Mar., 31–39

Sustainable water—lessons from the developing world.

Wong K.-F. S. June, 55–62
