

Proceedings of the Institution of Civil Engineers 2000

Geotechnical Engineering Vol. 143

Subject index

Brickwork & masonry

Modelling tunnelling-induced settlement of masonry buildings. Burd H.K., Houlby G.T., Augarde C.E. and Liu G. Jan., 17–29

Codes of practice & standards

Comparison of European bearing capacity calculation methods for shallow foundations. Sieffert J.-G. and Bay-Gress Ch. Apr., 65–74

Design methods & aids

Applying triaxial compression stiffness data to settlement prediction of shallow foundations on cohesionless soil. Lehané B. and Cosgrove E. Oct., 191–200

Relationships between shaft capacity of driven piles and CPT end resistance. Lehané B.M., Chow F.C., McCabe B.A. and Jardine R.J. Apr., 93–101

Dynamics

Integrity testing of pile foundations using axial vibration. Lilley D.M. Oct., 225–234

Environment

Pilot *in situ* auger mixing treatment of a contaminated site. Part 3. Time-related performance. Al-Tabbaa A. and Evans C.W. Apr., 103–114

The benefits from geotechnics in construction of the A34 Newbury Bypass. Perry J., Field M., Davidson W. and Thompson D. Apr., 83–92

European Union (EU)

Comparison of European bearing capacity calculation methods for shallow foundations. Sieffert J.-G. and Bay-Gress Ch. Apr., 65–74

Excavation

Measurement and analysis of temporary prop loads at Canary Wharf underground station, east London. Batten M. and Powrie W. July, 151–163

Field testing

Instrumentation for monitoring sprayed concrete lined soft ground tunnels. Clayton C.R.L., Hope V.S., Heymann G., van der Berg J.P. and Bica A.V.D. July, 119–130

Foundations

Applying triaxial compression stiffness data to settlement prediction of shallow foundations on cohesionless soil. Lehané B. and Cosgrove E. Oct., 191–200

Comparison of European bearing capacity calculation methods for shallow foundations. Sieffert J.-G. and Bay-Gress Ch. Apr., 65–74

Drained shear strength of fine-grained soil–solid

surface interfaces. Subba Rao K.S., Allam M.M. and Robinson R.G. Apr., 75–81

Liquid limit of soils from equilibrium water content in one-dimensional normal compression. Sridharan A., Nagaraj H.B. and Prasad P.S. July, 165–169

Non-linear analysis of pile groups (Discussion). Basile F. Oct., 241–244

The behaviour of lightly loaded piles in swelling ground and implications for their design. Crilly M.S. and Driscoll R.M.C. Jan., 3–16

Geotechnical engineering

Assessment of settlements caused by groundwater control. Preene M. Oct., 177–190

Classification procedures for expansive soils. Sridharan A. and Prakash K. Oct., 235–240

Drained shear strength of fine-grained soil–solid surface interfaces. Subba Rao K.S., Allam M.M. and Robinson R.G. Apr., 75–81

Liquid limit of soils from equilibrium water content in one-dimensional normal compression. Sridharan A., Nagaraj H.B. and Prasad P.S. July, 165–169

Non-linear analysis of pile groups (Discussion). Basile F. Oct., 241–244

Pilot *in situ* auger mixing treatment of a contaminated site. Part 3. Time-related performance. Al-Tabbaa A. and Evans C.W. Apr., 103–114

Relationships between shaft capacity of driven piles and CPT end resistance. Lehané B.M., Chow F.C., McCabe B.A. and Jardine R.J. Apr., 93–101

The benefits from geotechnics in construction of the A34 Newbury Bypass. Perry J., Field M., Davidson W. and Thompson D. Apr., 83–92

Wetting collapse in opencast coalmine backfill. Blanchfield R. and Anderson W.F. July, 139–149

Groundwater

Assessment of settlements caused by groundwater control. Preene M. Oct., 177–190

Information technology

The geotechnical database for the Jubilee Line Extension project. Withers A., Pontin S. and Black M. July, 131–138

Mathematical modelling

Integrity testing of pile foundations using axial vibration. Lilley D.M. Oct., 225–234

Load/settlement prediction for large-diameter bored piles in Mercia mudstone. Delpak R., Omer J.R. and Robinson R.B. Oct., 201–224

Modelling tunnelling-induced settlement of masonry buildings. Burd H.K., Houlby G.T., Augarde C.E. and Liu G. Jan., 17–29

Mining & quarrying

Wetting collapse in opencast coalmine backfill.
Blanchfield R. and Anderson W.F. July, 139–149

Models (physical)

Tunnelling-induced ground movements in clay. Grant R.J. and Taylor R.N. Jan., 43–55

Piles & piling

Integrity testing of pile foundations using axial vibration. Lilley D.M. Oct., 225–234

Load/settlement prediction for large-diameter bored piles in Mercia mudstone. Delpak R., Omer J.R. and Robinson R.B. Oct., 201–224

Non-linear analysis of pile groups (Discussion). Basile F. Oct., 241–244

Relationships between shaft capacity of driven piles and CPT end resistance. Lehane B.M., Chow F.C., McCabe B.A. and Jardine R.J. Apr., 93–101

The behaviour of lightly loaded piles in swelling ground and implications for their design. Crilly M.S. and Driscoll R.M.C. Jan., 3–16

Research & development

Pilot *in situ* auger mixing treatment of a contaminated site. Part 3. Time-related performance. Al-Tabbaa A. and Evans C.W. Apr., 103–114

Retaining walls

Drained shear strength of fine-grained soil–solid surface interfaces. Subba Rao K.S., Allam M.M. and Robinson R.G. Apr., 75–81

Measurement and analysis of temporary prop loads at Canary Wharf underground station, east London. Batten M. and Powrie W. July, 151–163

Roads & highways

Liquid limit of soils from equilibrium water content in one-dimensional normal compression. Sridharan A., Nagaraj H.B. and Prasad P.S. July, 165–169

The benefits from geotechnics in construction of the A34 Newbury Bypass. Perry J., Field M., Davidson W. and Thompson D. Apr., 83–92

Site investigation

Load/settlement prediction for large-diameter bored piles in Mercia mudstone. Delpak R., Omer J.R. and Robinson R.B. Oct., 201–224

The use of field geophysical techniques to determine geotechnical stiffness parameters. Matthews M.C., Clayton C.R.I. and Own Y. Jan., 31–42

Strength & testing of materials

Applying triaxial compression stiffness data to settlement prediction of shallow foundations on cohesionless soil. Lehane B. and Cosgrove E. Oct., 191–200

Subsidence

Assessment of settlements caused by groundwater control. Preece M. Oct., 177–190

The behaviour of lightly loaded piles in swelling ground and implications for their design. Crilly M.S. and Driscoll R.M.C. Jan., 3–16

The geotechnical database for the Jubilee Line Extension project. Withers A., Pontin S. and Black M. July, 131–138

Tunnelling-induced ground movements in clay. Grant R.J. and Taylor R.N. Jan., 43–55

Wetting collapse in opencast coalmine backfill. Blanchfield R. and Anderson W.F. July, 139–149

Temporary props

Measurement and analysis of temporary prop loads at Canary Wharf underground station, east London. Batten M. and Powrie W. July, 151–163

Testing & monitoring

Instrumentation for monitoring sprayed concrete lined soft ground tunnels. Clayton C.R.I., Hope V.S., Heymann G., van der Berg J.P. and Bica A.V.D. July, 119–130

Tunnels & tunnelling

Instrumentation for monitoring sprayed concrete lined soft ground tunnels. Clayton C.R.I., Hope V.S., Heymann G., van der Berg J.P. and Bica A.V.D. July, 119–130

Modelling tunnelling-induced settlement of masonry buildings. Burd H.K., Housby G.T., Augarde C.E. and Liu G. Jan., 17–29

The geotechnical database for the Jubilee Line Extension project. Withers A., Pontin S. and Black M. July, 131–138

Tunnelling-induced ground movements in clay. Grant R.J. and Taylor R.N. Jan., 43–55
