

## Subject index

### Anchors & anchorages

- Compression/tension load capacity of stone column anchors.  
Liu K.-F., Xie X.-Y., Zhang J.-F. and Zhu X.-R. Jul.,  
161–165
- Installing rock anchorages in a nuclear-licensed dock site.  
Chapman M., Parrish S. and Solley K. Apr., 63–75

### Bridges

- Foundation design for a large arch bridge on alluvial soils.  
Monnet J., Allagnat D., Teston J., Billet P. and Baguelin F.  
Jan., 19–28

### Dams, barrages & reservoirs

- Analysis of behaviour of a high rockfill dam. Soroush A. and  
Aghaei Araei A. Jan., 49–59

### Design methods & aids

- Design of braced excavations to limit ground movements.  
Osman A. S. and Bolton M. D. Jul., 167–175
- Foundation design for a large arch bridge on alluvial soils.  
Monnet J., Allagnat D., Teston J., Billet P. and Baguelin F.  
Jan., 19–28
- Knowledge-based design and construction of driven piles.  
Zhang L. M., Shek L. M. P., Pang H. W. and Pang C. F. Jul.,  
177–185
- Use of stiffness inserts in pile groups and piled rafts. Poulos  
H. G. Jul., 153–160

### Diaphragm walls

- Building a deep isolating wall by an existing rail tunnel.  
Molins C. and Ledesma A. Jul., 219–226

### Dynamics

- Dynamic response of laterally loaded piles in clay.  
Boominathan A. and Ayothiraman R. Jul., 233–241

### Embankments

- Analysis of behaviour of a high rockfill dam. Soroush A. and  
Aghaei Araei A. Jan., 49–59

### Excavation

- Design of braced excavations to limit ground movements.  
Osman A. S. and Bolton M. D. Jul., 167–175

### Field testing & monitoring

- Building a deep isolating wall by an existing rail tunnel.  
Molins C. and Ledesma A. Jul., 219–226
- Compression/tension load capacity of stone column anchors.  
Liu K.-F., Xie X.-Y., Zhang J.-F. and Zhu X.-R. Jul.,  
161–165
- Dynamic response of laterally loaded piles in clay.  
Boominathan A. and Ayothiraman R. Jul., 233–241

Performance of bored piles with different construction

- methods. Chen C. S. and Hiew L. C. Jul., 227–232
- Pipe pile installation effects in soft clay. Xu X. T., Liu H. L. and  
Lehane B. M. Oct., 285–296
- Set-up effect in long piles in weathered soils. Shek L. M. P.,  
Zhang L. M. and Pang H. W. Jul., 145–152
- Some observations on Statnamic pile testing. Brown M. J. and  
Hyde A. F. L. Oct., 269–273

### Foundations

- Disturbed strain measurement for pile foundations. Klar A.,  
Bennett P. J., Soga K., Mair R. J., Tester P., Fernie R., St John  
H. D. and Torp-Peterson G. Jul., 135–144
- Knowledge-based design and construction of driven piles.  
Zhang L. M., Shek L. M. P., Pang H. W. and Pang C. F. Jul.,  
177–185
- Performance of bored piles with different construction  
methods. Chen C. S. and Hiew L. C. Jul., 227–232
- Piled foundations for Eureka Tower, Melbourne, Australia.  
Ervin M. C. and Finlayson J. E. Jul., 187–194
- Rock-socketed pile design and construction: a better way?  
Haberfield C. and Collingwood B. Jul., 207–217
- Set-up effect in long piles in weathered soils. Shek L. M. P.,  
Zhang L. M. and Pang H. W. Jul., 145–152
- Stiffness and cyclic response of clayey fine sands. Smith N.  
Oct., 251–268
- Use of stiffness inserts in pile groups and piled rafts. Poulos  
H. G. Jul., 153–160

### Geotechnical engineering

- 3D modelling of sprayed-concrete-lined tunnels in clay.  
Yazdchi M., Macklin S. R. and Yeow H.-C. Oct., 243–250
- Analysis of behaviour of a high rockfill dam. Soroush A. and  
Aghaei Araei A. Jan., 49–59
- Design of braced excavations to limit ground movements.  
Osman A. S. and Bolton M. D. Jul., 167–175
- Disturbed strain measurement for pile foundations. Klar A.,  
Bennett P. J., Soga K., Mair R. J., Tester P., Fernie R., St John  
H. D. and Torp-Peterson G. Jul., 135–144
- Eurocode design of underground metro structures. Beadman  
D. R. Jan., 29–33
- Modelling the bearing capacity of displacement piles in sand.  
Broere W. and van Tol A. F. Jul., 195–206
- Numerical analysis of matric suction effects of tree roots.  
Indraratna B., Fatahi B. and Khabbaz H. Apr., 77–90
- Performance of bored piles with different construction  
methods. Chen C. S. and Hiew L. C. Jul., 227–232
- Sample disturbance effects on medium plasticity clay/silt. Long  
M. Apr., 99–111
- Some observations on Statnamic pile testing. Brown M. J. and  
Hyde A. F. L. Oct., 269–273

### **Geotextiles, membranes & grids**

Discrete element modelling of geogrid-reinforced aggregates.  
McDowell G. R., Harireche O., Konietzky H., Brown S. F. and  
Thom N. H. Jan., 35–48

### **Hydrology & water resource**

Numerical analysis of matric suction effects of tree roots.  
Indraratna B., Fatahi B. and Khabbaz H. Apr., 77–90

### **Laboratory tests**

A geotechnical classification system for coal ashes. Prakash K.  
and Sridharan A. Apr., 91–98

### **Mathematical modelling**

Discrete element modelling of geogrid-reinforced aggregates.  
McDowell G. R., Harireche O., Konietzky H., Brown S. F. and  
Thom N. H. Jan., 35–48  
Modelling the bearing capacity of displacement piles in sand.  
Broere W. and van Tol A. F. Jul., 195–206  
Numerical analysis of matric suction effects of tree roots.  
Indraratna B., Fatahi B. and Khabbaz H. Apr., 77–90  
The response of surface structures to tunnel construction.  
Franzius J. N., Potts D. M. and Burland J. B. Jan., 3–17

### **Offshore engineering**

Stiffness and cyclic response of clayey fine sands. Smith N.  
Oct., 251–268

### **Piles & piling**

Compression/tension load capacity of stone column anchors.  
Liu K.-F., Xie X.-Y., Zhang J.-F. and Zhu X.-R. Jul., 161–  
165  
Disturbed strain measurement for pile foundations. Klar A.,  
Bennett P. J., Soga K., Mair R. J., Tester P., Fernie R., St John  
H. D. and Torp-Peterson G. Jul., 135–144  
Dynamic response of laterally loaded piles in clay.  
Boominathan A. and Ayothiraman R. Jul., 233–241  
Eurocode design of underground metro structures. Beadman  
D. R. Jan., 29–33  
Knowledge-based design and construction of driven piles.  
Zhang L. M., Shek L. M. P., Pang H. W. and Pang C. F. Jul.,  
177–185  
Modelling the bearing capacity of displacement piles in sand.  
Broere W. and van Tol A. F. Jul., 195–206  
Piled foundations for Eureka Tower, Melbourne, Australia.  
Ervin M. C. and Finlayson J. E. Jul., 187–194  
Pipe pile installation effects in soft clay. Xu X. T., Liu H. L. and  
Lehane B. M. Oct., 285–296  
Rock-socketed pile design and construction: a better way?  
Haberfield C. and Collingwood B. Jul., 207–217  
Set-up effect in long piles in weathered soils. Shek L. M. P.,  
Zhang L. M. and Pang H. W. Jul., 145–152  
Some observations on Statnamic pile testing. Brown M. J. and  
Hyde A. F. L. Oct., 269–273  
Use of stiffness inserts in pile groups and piled rafts. Poulos  
H. G. Jul., 153–160

### **Plasticity**

A geotechnical classification system for coal ashes. Prakash K.  
and Sridharan A. Apr., 91–98

### **Ports, docks & harbours**

Installing rock anchorages in a nuclear-licensed dock site.  
Chapman M., Parrish S. and Solley K. Apr., 63–75

### **Railway systems**

Discrete element modelling of geogrid-reinforced aggregates.  
McDowell G. R., Harireche O., Konietzky H., Brown S. F. and  
Thom N. H. Jan., 35–48

### **Retaining walls**

Building a deep isolating wall by an existing rail tunnel.  
Molins C. and Ledesma A. Jul., 219–226  
Eurocode design of underground metro structures. Beadman  
D. R. Jan., 29–33

### **Roads & highways**

Monitoring of tunnel behaviour through cataclastic rocks.  
Georgiannou V. N., Lefas I. D. and Boronkay K. A. Apr.,  
113–123

### **Rock mechanics**

Monitoring of tunnel behaviour through cataclastic rocks.  
Georgiannou V. N., Lefas I. D. and Boronkay K. A. Apr.,  
113–123

### **Safety & hazards**

Evaluating the seismicity parameters of Tehran, Iran. Ghodrati  
Amiri G., Motamed R., Hashemi R. and Nouri H. Oct.,  
275–283

### **Seismic engineering**

Evaluating the seismicity parameters of Tehran, Iran. Ghodrati  
Amiri G., Motamed R., Hashemi R. and Nouri H. Oct.,  
275–283  
Installing rock anchorages in a nuclear-licensed dock site.  
Chapman M., Parrish S. and Solley K. Apr., 63–75

### **Site investigation**

Foundation design for a large arch bridge on alluvial soils.  
Monnet J., Allagnat D., Teston J., Billet P. and Baguelin F.  
Jan., 19–28  
Piled foundations for Eureka Tower, Melbourne, Australia.  
Ervin M. C. and Finlayson J. E. Jul., 187–194  
Sample disturbance effects on medium plasticity clay/silt. Long  
M. Apr., 99–111  
Stiffness and cyclic response of clayey fine sands. Smith N.  
Oct., 251–268

### **Soil classification**

A geotechnical classification system for coal ashes. Prakash K.  
and Sridharan A. Apr., 91–98

### **Soil–structure interactions**

The response of surface structures to tunnel construction.  
Franzius J. N., Potts D. M. and Burland J. B. Jan., 3–17

### **Statistical analysis**

Evaluating the seismicity parameters of Tehran, Iran. Ghodrati  
Amiri G., Motamed R., Hashemi R. and Nouri H. Oct.,  
275–283

**Strength & testing of materials**

Sample disturbance effects on medium plasticity clay/silt. Long  
M. Apr., 99–111

**Stress analysis**

3D modelling of sprayed-concrete-lined tunnels in clay.  
Yazdchi M., Macklin S. R. and Yeow H.-C. Oct., 243–250

**Tunnels & tunnelling**

3D modelling of sprayed-concrete-lined tunnels in clay.  
Yazdchi M., Macklin S. R. and Yeow H.-C. Oct., 243–250  
Monitoring of tunnel behaviour through cataclastic rocks.  
Georgiannou V. N., Lefas I. D. and Boronkay K. A. Apr.,  
113–123  
The response of surface structures to tunnel construction.  
Franzius J. N., Potts D. M. and Burland J. B. Jan., 3–17
