

Note of Appreciation to Paper Reviewers

The quality of the technical journal *Geosynthetics International*, and hence its reputation as the premiere peer-reviewed journal on geosynthetics and related topics, depends on the dedication of the many reviewers who donate their time and expertise to assess submissions to the journal. The Editor and Chair of the Editorial Board would like to thank the following individuals for completing manuscript reviews for the papers that appeared in Volume 17 of the journal or were declined for publication in 2010.
