

Papers, books and articles on concrete

MARCH - JULY 1950

PAPERS AND BOOKS *Drawn from C.A.C.A. Library additions*

- MINISTRY OF WORKS. Concreting in cold weather. Advisory Leaflet No. 7. pp. 8.
- MINISTRY OF WORKS. Bricklaying in cold weather. Advisory Leaflet No. 8. pp. 6.
- WIGMORE, V. S. Concrete simply explained. 3rd edition. London. *The Society of Engineers (Incorporated)*. 1950. pp. 48.
- COWPER, A. D. Sands for plasters, mortars and external renderings. National Building Studies Bulletin No. 7. Dept. of Scientific and Industrial Research. *H. M. Stationery Office*. 1950. pp. iv, 20.
- BUILDING RESEARCH STATION. The reduction of sound transmission through concrete floors. B.R.S. Digest No. 19. *H. M. Stationery Office*. 1950. pp. 6.
- LOE, J. A. Concrete kerbs. Causes and prevention of failures. Road Research Technical Paper No. 18. *H. M. Stationery Office*. 1950. pp. iv, 18.
- ROSE, E. O. and GEDGE, W. T. Forty years of reinforced concrete, with special reference to recent developments. *Southern Association of Gas Engineers and Managers*. 23rd May 1950. pp. 18.
- BATEMAN, J. H. A study of the effects of Pozzololith on the consistency, strength and composition of concrete. Engineering Experiment Station Bulletin Series No. 15. *Louisiana State University*. 1950. pp. 12.
- HIGHWAY RESEARCH BOARD. Use of air-entrained concrete in pavements and bridges. Current Road Problems No. 13-R, Revised edition. *Highway Research Board, Washington, U.S.A.* May 1950. pp. 76.
- KLEINLOGEL, A., WALZ, K. and VIERHELLER, H. Einflüsse auf Beton und Stahlbeton. Die chemischen, mechanischen und sonstigen Einwirkungen auf Beton und Stahlbeton, sowie die Beeinflussung der zugehörigen Eigenschaften. (Influences on concrete and reinforced concrete. Chemical, mechanical and other actions on concrete and reinforced concrete as well as effects on the corresponding properties.) 5th edition. Berlin. *Verlag von Wilhelm Ernst und Sohn*. 1950. Vol. 2. G-R. pp. 97-208. Vol. 3. R-Z. pp. 209-340.
- DITTRICH, R. Strassendecken aus Weichbeton. Ein Erfahrungsbericht über die 1938 gebaute Versuchsstrecke auf der Autobahn bei Berlin. (Road slabs of concrete made from wet mixes. A note on experience of the experimental section of the autobahn near Berlin constructed in 1938.) *Strassen und Tiefbau Verlagsgesellschaft m.b.H., Berlin*. 1950. pp. 72.
- DITTRICH, R. Rissebildung in Betonfahrbahndecken in Abhängigkeit vom Zement. Erkenntnisse aus den Einbauversuchen mit 18 Zementen auf der Autobahn bei Berlin im Herbst 1937. (The formation of cracks in concrete road surfaces related to the cement used. Results obtained with the use of 18 cements on the autobahn near Berlin in the autumn of 1937.) *Strassen und Tiefbau Verlagsgesellschaft m.b.H., Berlin*. 1950. pp. 96.
- FORSCHUNGSGESELLSCHAFT FÜR DAS STRASSENWESEN, e.V. Neue Wege im Betonstrassenbau. Referate in der Sitzung der Arbeitsgruppe Betonstrassen am 29. Oktober 1949 zu Stuttgart. (New methods in concrete road construction. Report of the session of the working party on concrete roads held on the 29th of October in Stuttgart.) Köln-Deutz. Published by the above. 1950. pp. 100.
- STADOR, KARL. Statisches Tagebuch. (Statics journal.) 1st edition. Dusseldorf. *Karl Marklein Verlag G.M.B.H.* 1950. pp. 200.
- LABORATORIUMSAUSSCHUSS DES VEREINS DEUTSCHER PORTLAND UND HUTTENZEMENTWERKE e.V. Analysengang für Normenemente. (Analysis of standard cements.) Schriftenreihe der Zementindustrie Heft 4. *Bauverlag G.M.B.H.* Wiesbaden. 1950. pp. 16.
- GRAF, O. Die Eigenschaften des Betons. (The properties of concrete.) 1st edition. Berlin. *Springer Verlag*. 1950. pp. xii, 320.
- SOLVEY, O. R. Neue rationelle Betonerzeugung. (Rationalization of concrete production.) 1st edition. Vienna. *Springer Verlag*. 1949. pp. x, 110.

LAFUMA, H. Relations entre les structures et les propriétés mécaniques, physiques et chimiques dans les matériaux silicatés. (Relationship between the structure and the mechanical, physical and chemical properties of siliceous materials.) Note d'Information No. 7. Paris. *Centre d'Etudes et de Recherches de l'Industrie des Liants Hydrauliques*. 1950. pp. 24.

LAFUMA, H. L'évolution de l'industrie des ciments. (The development of the cement industry.) Note d'Information No. 9. Paris. *Centre d'Etudes et de Recherches de l'Industrie des Liants Hydrauliques*. 1950. pp. 12.

L'HERMITE, R. Récentes recherches sur la vibration du béton frais. (Recent research on the vibration of fresh concrete.) Cahier No. 77. Paris. *Centre Scientifique et Technique du Bâtiment*. 1950. pp. 16.

DREYFUS, J. La chimie des ciments. (The chemistry of cements.) 1st edition. Paris. *Editions Eyrolles*. 1950. (In two volumes.) Vol. 1. Exposé théorique. (Theory.) pp. 1-352. Vol. 2. Valeurs numériques, figures et annexes. (Numerical values, illustrations and appendices.) pp. 353-584.

BERGSTROM, S. G. Temperature stresses in concrete pavements. Proceedings No. 14. (In English.) *Swedish Cement and Concrete Research Institute, Stockholm*. 1950. pp. 40.

The following publications were issued by the Institut Technique du Bâtiment et des Travaux Publics, Paris :

CHAMBAUD, R. Calcul des coupôles elliptiques surbaissées. (Calculation of flat elliptical domes.) Manuel du Béton Armé No. 19. May 1950. pp. 12.

DUTRON, R. Les bétons légers. (Lightweight concretes.) Béton, Béton Armé No. 13. June 1950. pp. 14.

CHEFDEVILLE, J. and DAWANCE, G. L'auscultation dynamique du béton. Méthode vibratoire de mesure du module d'élasticité des bétons en oeuvre et sur éprouvettes. (Method of measuring by vibration the modulus of elasticity of concretes on the site and in the laboratory.) Essais et Mesures No. 16. July-August 1950. pp. 28.

The following publications were issued by The Danish National Institute of Building Research, Copenhagen. They are both in English :

PLUM, N. M. The predetermination of water requirement and optimum grading of concrete under various conditions. Building Research Studies No. 3. 1950. pp. 96.

ANDERSEN, J., NERENST, P. and PLUM, N. M. The non-destructive testing of concrete with special reference to the wave-velocity method. Building Research Report No. 3. pp. viii, 80.

The following publications were issued by the National Ready Mixed Concrete Association, Washington, U.S.A.:

Recommended practices for sampling and testing ready-mixed concrete. 1st revision. 1950. pp. 20.

WALKER, S. and BLOEM, D. L. Tests of admixtures for concrete. Miscellaneous Publication No. 28. pp. 12.

BULLOCK, C. D. Lightweight concrete in building construction. Miscellaneous Publication No. 30. pp. 12.

RUSSELL, H. W. and LITEHISER, R. R. Ready-mixed concrete in highway construction. Miscellaneous Publication No. 31. pp. 8.

The following publications were issued by the Portland Cement Association of America, Chicago :

Modern developments in reinforced concrete No. 25. Design of prestressed concrete. pp. 16.

Architectural Concrete. Vol. 14, No. 2. pp. 20.

Architectural Concrete. Vol. 15, No. 1. pp. 20.

Concrete Highways and Public Improvements. Vol. 31, No. 1. Spring 1950. pp. 16.

Concrete Highways and Public Improvements. Vol. 31, No. 2. Summer 1950. pp. 16.

Concrete for Railways. Vol. 14, No. 1. pp. 16.

P.C.A. Soil Primer. 1950. pp. 76.

Colour in architectural concrete by the aggregate transfer method. pp. 12.

Design of concrete airport pavement. 1950. pp. 48.

EUBANK, W. R. Phase equilibrium studies of the high-lime portion of the quinary system $\text{Na}_2\text{O}-\text{CaO}-\text{Al}_2\text{O}_3-\text{Fe}_2\text{O}_3-\text{SiO}_2$. Paper No. 56 of the Portland Cement Association Fellowship at the National Bureau of Standards, Washington. February 1950. pp. 20.

The following publications were issued by the Cement and Concrete Association, London :

Concrete shell and barrel roofs. 2nd edition. May 1950. Bb. 5. pp. 52.

Concrete practice in building construction. March 1950. Bb. 11. pp. vi, 62.

Vacuum concrete. March 1950. C.A.C.A. Library Record Ch. 13. pp. 6.

Prestressed concrete work in Great Britain. June 1950. C.A.C.A. Library Record Ch. 14. pp. 18.

BAAR, G. Prestressed concrete for a large business block. Shop and offices of Vroom and Dreesman at Heerlen. March 1950. C.A.C.A. Library Translation No. 15. Cj. 15. pp. 8.

JOISEL, A. Characteristics of standard mortars. May 1950. C.A.C.A. Library Translation No. 16. Cj. 16. pp. 40.

KRAMER, D. and REK, F. A concrete slab bridge prestressed by the Baur-Leonhardt method. June 1950. C.A.C.A. Library Translation No. 17. Cj. 17. pp. 10.

KAISER, A. The bridge over the Port Canal at Heilbronn. June 1950. C.A.C.A. Library Translation No. 18. Cj. 18. pp. 26.

LAMMLEIN, A. The comparative cost of a bridge in prestressed and reinforced concrete. June 1950. C.A.C.A. Library Translation No. 19. Cj. 19. pp. 8.

Concrete Quarterly. No. 8. April 1950. pp. 36.

Questions and answers on concrete road construction. May 1950. Db. 5. pp. 48.

Specification for a coloured concrete road using mechanical compaction. June 1950. Df. 7. pp. 12.

Specification for a coloured concrete road using manual compaction. June 1950. Df. 8. pp. 12.

Reinforced concrete framing for farm buildings. 2nd edition. June 1950. Farm Construction Leaflet No. 3. Fe. 3. pp. 4.

The combined milking parlour and dairy. April 1950. Farm Construction Leaflet No. 6. Fe. 6. pp. 8.

Combined milking parlour and dairy (without electricity supply). June 1950. Fg. 3. pp. 6.

Bull pens. June 1950. Fg. 4. pp. 6.
