

Papers and books on cement and concrete

Received in the C&CA Library JULY-SEPTEMBER 1974*

MATERIALS

Cement

MANUFACTURE

HAMMER, H. Verfahren für die Rezeptberechnung bei der Mischung von Rohmaterialien. (Method of calculating raw mix proportions.) *Zement-Kalk-Gips*. Vol. 27, No. 5. August 1974. pp. 365-370.

PELLETIER, D. and DROP, H. Design and operation of kiln burners. *Cement Technology*. Vol. 5, No. 4. July/August 1974. pp. 371-377.

SALGE, H. and THORMANN, P. The effect of P_2O_5 on the contribution of Portland cement clinker. *Zement-Kalk-Gips*. Vol. 26, No. 11. 1973. pp. 532-539. Translated from the German. Garston, Building Research Establishment, 1974. pp. 14. Library Translation No. LT 1853.

SHEVTSOV, A. S. Optimal planning of the production programme for a cement plant. *Zement*. No. 8. August 1974. pp. 4-6. (In Russian.)

SYTCHEV, M. M. and VOLKOVSKY, B. V. Variable phase composition and the phase relations in clinker. *Zement*. No. 9. September 1974. pp. 12-14. (In Russian.)

TAO, H. S. Dust control at the Tasek Cement Works, Malaysia. *Cement Technology*. Vol. 5, No. 4. July/August 1974. pp. 384-392.

WICKERT, H. Beitrag zur Analyse von Rohmehl sowie Tonen, Mergeln und ähnlichen Zementrohstoffen. (Contribution to the analysis of raw meal and of clays, marls and similar cement raw materials.) *Zement-Kalk-Gips*. Vol. 27, No. 8. August 1974. pp. 375-379.

ZLATOKRYLOV, P. M., BOKOMOLOV, B. N. and TKACH, L. I. On reducing the frequency of shut-downs and the idle time of equipment to be repaired. *Zement*. No. 7. July 1974. p. 11. (In Russian.)

PROPERTIES

BENSTED, J. and VARMA, S. P. Some applications of infrared and Raman spectroscopy. Part 2 - Portland cement and its applications. *Cement Technology*. Vol. 5, No. 4. July/August 1974. pp. 378-382.

BRUERE, G. M. Bleeding of cement pastes containing paraffin wax emulsions and clays. *Cement and Concrete Research*. Vol. 4, No. 4. July 1974. pp. 557-566.

CHIOCCHIO, G. and COLLEPARDI, M. Idratazione in autoclave dei costituenti del cemento Portland in presenza di cloruro di calcio. (Autoclave hydration of the constituents of Portland cement in the presence of calcium chloride.) *Il Cemento*. Vol. 71, No. 2. April-June 1974. pp. 57-66.

FELDMAN, R. F. *Volume change, porosity and helium flow studies of hydrated Portland cement*. Preprinted from Proceedings RILEM/IUPAC 1973 International symposium on pore structure and properties of materials, Prague, 18-21 September 1973. Ottawa, National Research Council of Canada, pp. 16. DBR Research Paper No. 583.

FLATTEN, H. and VOMBERG, W. Überlegungen zum Verformungsverhalten von Feinmörtel und Frischbeton. (Considerations on the rheological behaviour of fine mortars and fresh concrete.) *Betonwerk + Fertigteil-Technik*. Vol. 40, No. 7. July 1974. pp. 469-475.

HARRIS, D. H. C., WINDSOR, C. G. and LAWRENCE, C. D. Free and bound water in cement pastes. *Magazine of Concrete Research*. Vol. 26, No. 87. June 1974. pp. 65-72.

LUKATSKY, A. A., PANKRATOV, V. L., GUSEV, A. I. and VASILIK, A. V. Slag Portland cement for hydraulic engineering structures. *Zement*. Vol. 7. July 1974. pp. 12-13. (In Russian.)

MARCHESE, B. A scanning electron microscopy contribution to the study of cement pastes. Note II: Morphology of the hydration products of tricalcium silicate solutions, with one or more foreign components. *Il Cemento*. Vol. 71, No. 2. April-June 1974. pp. 67-74.

MARKESTAD, S. A. Einige Ergebnisse und weitere Erfahrungen mit der Pastenmethode zur Bestimmung der Festigkeitseigenschaften der Zemente. (Some results and further experience with the paste method of determining the strength properties of cements.) *Zement-Kalk-Gips*. Vol. 26, No. 1. January 1973. pp. 41-52.

MEHTA, P. K., KLEIN, A. and MORALES, R. T. Investigación de los productos de hidratación en el sistema $4CaO \cdot 3Al_2O_3 \cdot SO_3 - CaSO_4 - CaO - H_2O$. (Study of hydration products in the system $4CaO \cdot 3Al_2O_3 \cdot SO_3 - CaSO_4 - CaO - H_2O$.) *Materiales de la Construcción*. No. 154. April-May-June 1974. pp. 51-79.

POLAK, A. F. and RATINOV, V. B. The mechanism and kinetics of the hardening of cement paste. *Zement*. No. 9. September 1974. pp. 15-17. (In Russian.)

TAMAS, F. D. and KOVACS, K. A generalization and computer solution of the Bogue calculation. *Cement Technology*. Vol. 5, No. 4. July/August 1974. pp. 393-401.

VÁZQUEZ, F. T. Hidratación del aluminato tricálcico en presencia de yeso. (Hydration of tricalcium aluminate in the presence of gypsum.) *Materiales de Construcción*. No. 154. April-May-June 1974. pp. 5-15.

*For the benefit of readers who wish to index these references, separate unbacked copies of this section of the *Magazine* may be obtained free of charge from the Editor.

VÁZQUEZ, F. T. Hidratación del cemento portland: estudio por diversas técnicas. (Hydration of Portland cement: study of various techniques.) *Materiales de Construcción*. No. 154. April–May–June 1974. pp. 17–50.

WITTMANN, F. and LUKAS, J. Experimental study of thermal expansion of hardened cement paste. *Materials and Structures: Research and Testing*. Vol. 7, No. 40. July/August 1974. pp. 247–252.

Aggregates

BRITISH STANDARDS INSTITUTION. BS 1047:Part 2:1974. *Specification for air-cooled blastfurnace slag coarse aggregate for concrete. Part 2: Metric units*. London. pp. 10.

GUTT, W., TEYCHENNÉ, D. C. and HARRISON, W. H. The use of lighter-weight blastfurnace slag as dense coarse aggregate in concrete. *Magazine of Concrete Research*. Vol. 26, No. 88. September 1974. pp. 123–143.

Reinforcement

BANNISTER, J. L. Resistance of high-tensile cold-worked ribbed reinforcement to fluctuating loads. *Concrete*. Vol. 8, No. 9. September 1974. pp. 42–44.

CLEAR, K. C. and HAY, R. E. *Time-to-corrosion of reinforcing steel in concrete slabs. Vol. 2: Electrical potential data*. Washington, D.C., U.S. Federal Highway Administration, 1973. pp. 133. PB-226 053.

COOK, D. J. and UHER, C. The thermal conductivity of fibre-reinforced concrete. *Cement and Concrete Research*. Vol. 4, No. 4. July 1974. pp. 497–509.

COOK, D. J. and UHER, C. *The thermal conductivity of fibre-reinforced concrete*. Kensington, N.S.W., University of New South Wales, 1973. pp. 11. Unicity Report No. R-119.

COOKE, A. M. *A comparison of the bond strength of black and galvanised plain reinforcing bars to concrete*. Sydney, Cement and Concrete Association of Australia, 1974. pp. 16. TM 95.

HANEČKA, K. and ŠIMOR, J. Súdružnosť výstuže s priečne priradenými prútmí v pórobetóne. (Bond of cellular concrete and reinforcement with transverse welded bars.) *Stavebnícky Casopis*. Vol. 22, No. 6. June 1974. pp. 301–314.

KOWALSKI, T. G. Bamboo-reinforced concrete. *The Indian Concrete Journal*. Vol. 48, No. 4. April 1974. pp. 119–121.

MADATJAN, S. A. Deformations of high-tensile reinforcement during electro-thermal tension. *Beton i Zhelezobeton*. No. 9. September 1974. pp. 14–16. (In Russian.)

MÜLLER, K. Anti-corrosive paints for gas concrete reinforcement. *Building Research and Practice*. Vol. 2, No. 4. July/August 1974. pp. 220–221.

STOWE, R. L. *Pullout resistance of reinforcing bars embedded in hardened concrete*. Vicksburg, U.S. Army Engineer Waterways Experiment Station, 1974. pp. 31. Miscellaneous Paper C-74-12.

TATTERSALL, G. H. and URBANOWICZ, C. R. Bond strength in steel-fibre reinforced concrete. *Magazine of Concrete Research*. Vol. 26, No. 87. June 1974. pp. 105–113.

Admixtures

BRITISH STANDARDS INSTITUTION. BS 5075:Part 1:1974. *Specification for concrete admixtures. Part 1: Accelerating admixtures, retarding admixtures and water-reducing admixtures*. London. pp. 17.

FOWLER, D. Carbon fibre cement. *Civil Engineering*. No. 817. September 1974. pp. 34–37.

MORGAN, D. R. Possible mechanisms of influence of admixtures on drying shrinkage and creep in cement paste and concrete. *Materials and Structures: Research and Testing*. Vol. 7, No. 40. July/August 1974. pp. 283–289.

RABER, P. Pigmentation of concrete and mortar. *Modern Concrete*. Vol. 38, No. 2. June 1974. pp. 55–57.

SUBRAMANIAM, P. M. and DANKE, P. S. Investigation of tributyl phosphate for use as air-detraining agent in heavy concrete. *The Indian Concrete Journal*. Vol. 48, No. 3. March 1974. pp. 90–94.

CONCRETE

Mix design and quality control

ANON. Designing concrete mixes for increased fire or heat resistance. *Concrete Construction*. Vol. 19, No. 8. August 1974. pp. 403–407.

RICHARDSON, J. G. Errors and omissions excepted. *Precast Concrete*. Vol. 5, No. 9. September 1974. pp. 507–512.

VARCHNEY, R. S. and GOEL, M. C. Effect of delay in placing on normal concrete and air-entrained concrete. *The Indian Concrete Journal*. Vol. 48, No. 3. March 1974. pp. 82–89.

Properties

ACI COMMITTEE 207. Effect of restraint, volume change and reinforcement on cracking of massive concrete. *Journal of the American Concrete Institute. Proceedings* Vol. 70, No. 7. July 1973. pp. 445–470.

ALTSHULER, B. Elastic and plastic characteristics of concrete heated under load. *Beton i Zhelezobeton*. No. 9. September 1974. pp. 11–12. (In Russian.)

AMMAR, C., DUTRON, P., MOTTEU, H. and DUBOIS, J. *La progression des résistances des bétons et des mortiers par basses températures*. (Strength development of concrete and mortar at low temperatures.) Brussels, Centre Scientifique et Technique de la Construction, 1973. pp. 182.

BALAZS, G. *A beton húzószilárdsága*. (Concrete tensile strength.) Budapest, Közlekedési Dokumentációs Vallalat, 1974. pp. 123.

BELIER, O. Betonirakenteiden energiantarve. (Energy consumption in relation to concrete structures.) *Betonituote*. No. 3. 1974. pp. 18–19.

CAMPBELL-ALLEN, D. and ROGERS, D. F. *Shrinkage of concrete as affected by size*. Sydney, University of Sydney, 1974. pp. 31. Research Report No. R240.

CEMBUREAU. *Lightweight aggregate concrete: technology and world applications*. Paris, Cembureau, 1974. pp. 312.

CENTRE NATIONAL DE RECHERCHE SCIENTIFIQUES ET TECHNIQUES POUR L'INDUSTRIE CIMENTIERE. *Les bétons légers de structure: vade-mecum*. (Structural lightweight concretes: vade-mecum.) Brussels, 1974. pp. 53. RR CRIC 38-f-1974.

CONCRETE SOCIETY, THE. *The creep of structural concrete: Report of a working party of the Materials Technology Divisional Committee*. London, 1973. pp. 47. Technical Paper No. 101. Publication 51.072.

CORDES, H. Über die Spannungs-Dehnungslinie der Werkstoffe Stahl und Beton im Bereich der Höchstlast. (The stress-strain curves of the materials steel and concrete at ultimate load.) *Beton: Herstellung, Verwendung*. Vol. 24, No. 9. September 1974. pp. 338–341.

DAVYDOV, S. S. Investigation of polymer concrete and steel polymer concrete. *Beton i Zhelezobeton*. No. 3. 1972. pp. 1–5. Translated from the Russian by Joint Publications Research Service. Denver, U.S. Bureau of Reclamation, 1972. pp. 20. Translation No. 874.

DHIR, R. K., SANGHA, C. M. and MUNDAY, J. G. L. Age, environment and fractured concrete. *Civil Engineering*. No. 817. September 1974. pp. 44–51.

DHIR, R. K., SANGHA, C. M. and MUNDAY, J. G. L. Relationships between strength, deformation and age of autogenously healed concretes. *Quarry Management and Products*. Vol. 1, No. 3. August 1974. pp. 93–101.

DOMONE, P. L. Uniaxial tensile creep and failure of concrete. *Magazine of Concrete Research*. Vol. 26, No. 88. September 1974. pp. 144–152.

GRÜBL, P. Der Einfluss des Zuschlags und der Betonfestigkeit auf die Spannungs-Dehnungs-Linie von Konstruktivem Leichtbeton. (The influence of the aggregates and concrete strength on the stress-strain relations of lightweight concrete.) *Cement and Concrete Research*. Vol. 4, No. 4. July 1974. pp. 657–667.

HERMANN, V. Zum Problem der Pumpbarkeit von Leichtbeton. (The problem of the pumpability of lightweight concrete.) *Beton: Herstellung, Verwendung*. Vol. 29, No. 9. September 1974. pp. 333–337.
