

## From *Journal of Hydraulic Research*, vol. 43

### 43, No. 1

#### **Distributions of velocity, turbulence, and suspended sediment over low-relief antidunes**

D. G. Wren, S. J. Bennett, B. D. Barkdoll and R. A. Kuhnle

#### **Prediction of total bed material discharge**

S.-Q. Yang

#### **Dynamic behavior of bed material around bridge pier under water pressure variation**

MD. Faruque Mia and H. Nago

#### **An experimental investigation of jet flow on a stepped chute**

M. K. El-Kamash, M. R. Loewen and N. Rajaratnam

#### **Two-dimensional depth-averaged modeling of flow in curved open channels**

H. K. Ghamry and P. M. Steffler

#### **The dynamic effect of pipe-wall viscoelasticity in hydraulic transients. Part II—model development, calibration and verification**

D. Covas, I. Stoianov, J. F. Mano, H. Ramos, N. Graham and C. Maksimovic

#### **On the structure of a laminar buoyant jet released horizontally**

G. Querzoli and A. Cenedese

#### **Modeling of droplet formation in stratified immiscible liquid–liquid flows**

C. A. Badeau, S. Kandil, W. Wilson and P. Chang

#### **Boundary shear stress distributions in trapezoidal channels**

S.-Q. Yang and S.-Y. Lim

#### **Discussion. Roll waves simulation using shallow water equations and Weight Average Flux method**

By B. Zanuttigh and A. Lamberti

*Journal of Hydraulic Research*, 2002, **40**, No. 5, 610–622

Discusser: Carlo Montuori

### 43, No. 2

#### **Decision support model for operation of multi-purpose water resources systems**

O. R. Dölling and E. A. Varas

#### **Elaboration of management tool of a reservoir dam on the Sebou river (Morocco) using an implicit hydraulic model**

M. Igouzal and A. Maslouhi

#### **Sediment transport capacity in rivers**

S. Yang

#### **Energy losses and threshold conditions for choking in channel contractions**

B. Wu and A. Molinas

#### **Investigation of near wall velocity in 3-D smooth channel flows**

S. Yang, Siow-Yong and J. A. McCorquodale

#### **Curvilinear turbulence modelling of open channel flow**

J. J. R. Williams

#### **Correlation and distribution of shear stress for turbulent flow in a smooth rectangular open channel**

A. Bilgil

#### **Floating breakwaters under regular and irregular wave forcing: reflection and transmission characteristics**

E. Koutandos, P. Prinos and X. Gironella

#### **Fall velocities of natural sediment particles: a simple mathematical presentation of the fall velocity law**

K. She, L. Trim and D. Pope

#### **Inverse modeling of unsaturated heterogeneous media by two-phase pressure derivative matching**

K. Masumoto

#### **Multi-level fracture network model and FE solution for ground water flow in rock mass**

C. Junrui, L. Shouyi and Wuyanqing

**Technical note. Fluctuation approach to assessment of the reliability of radioactive waste disposal**

L. A. Bolshov, A. M. Dykhne and P. S. Kondratenko

**Technical note. Anomalous diffusion in regular heterogeneous media**

A. M. Dykhne, I. L. Dranikov and P. S. Kondratenko

**Discussion. Tailwater level effects on flow conditions at an abrupt drop**

By M. Mossa, A. Petrillo and H. Chanson.

*Journal of Hydraulic Research*, 2003, **41**, No. 1, 39–51

Discussers: Y. Yausda, M. Takahashi and I. Ohtsu

**43**, No. 3

**Du Boys and sediment transport**

W. H. Hager

**Physical modelling of the flow field in an undular tidal bore**

H. Chanson

**Influence of bed roughness on sediment suspension: experimental and theoretical studies**

B. S. Mazumder, K. Ghoshal and D. C. Dalal

**Velocity measurements in a developed open channel flow in the presence of an upstream perturbation**

R. Balachandar and V. C. Patel

**Success of booster chlorination for water supply networks with genetic algorithms**

O. N. Ozdemir and M. E. Uçaner

**Turbulence particle models for tracking free surfaces**

S. Shao and H. Gotoh

**Three-dimensional numerical simulation of wind-driven flows in closed channels and basins**

F. Cioffi, F. Gallerano and E. Napoli

**Modelling suspended sediment transport using an integrated numerical and ANNs model**

B. Lin and M. M. Namin

**Parameter identification using optimization techniques in open-channel inverse problems**

H. Roux and D. Dartus

**Theoretical and experimental study on flow distribution at fracture intersections**

H. Yunjin, M. Genhai, C. Weiping and Z. Junjun

**Discussion. Scour of a cohesive soil by submerged plane turbulent wall jets**

By K. A. Mazurek, N. Rajaratnam and D. C. Sego

*Journal of Hydraulic Research*, 2003, **41**, No. 2, 195–206

Discusser: S. A. Ansari

**Book review. Applied hydraulic transients for hydropower plants and pumping stations**

By M. Popescu, D. Arsenie and P. Vlase, October 2003, Balkema Publishers, 329 pp, €99

**43**, No. 4

**Finite volume modeling of variable density shallow-water flow equations for a well-mixed estuary: application to the Río Maipo estuary in central Chile**

L. Brice, C. Yarko Niño and M. Cristian Escauriaza

**Two-dimensional simulation of a thermally stratified reservoir with high sediment-laden inflow**

D. L. Young, Q. H. Lin and K. Murugesan

**SPH simulation of solitary wave interaction with a curtain-type breakwater**

S. Shao

**High-resolution TVD schemes in finite volume method for hydraulic shock wave modeling**

G.-F. Lin, J.-S. Lai and W.-D. Guo

**Two-dimensional and line jets in a weak cross-flow**

J. F. Huang, M. J. Davidson and R. I. Nokes

**On incompressible turbulent flow: partial average based theory and applications**

G. Gao and Y. Yong

**Vertically integrated numerical model to simulate breach formation by flow overtopping earth-filled dams: hydraulics**

R. Frenette and A. Munteanu

**Discharge equations for venturimeter and orificemeter**

P. K. Swamee

**Modified log-wake law for zero-pressure-gradient turbulent boundary layers**

J. Guo, P. Y. Julien and R. N. Meroney

**Discussion. Modified log-wake law for turbulent flow in smooth pipes**

J. Guo and P. Y. Julien

*Journal of Hydraulic Research*, 2003, **43**, No. 5, 493–501

Discusser: R. Booij

**Discussion. Modeling a washout of dams**

By A. L. Rozov

*Journal of Hydraulic Research*, 2003, **41**, No. 6, 565–577

Discusser: H. Chanson

**Discussion. Modeling of washout of dams**

By A. L. Rozov

*Journal of Hydraulic Research*, 2003, **41**, No. 6, 565–577

Discussers: M. J. Franca and A. B. Almeida

**Discussion. Clear-water scour development at bridge abutments**

By S. E. Coleman, C. S. Lauchlan and B. W. Melville  
*Journal of Hydraulic Research*, 2003, **41**, No. 5, 521–531  
Discusser: S. Giri

43, No. 5

**Developing a toolkit for fish passage, ecological flow management and fish habitat works**

C. Katopodis

**Direct measurement of vegetation resistance in prototype scale**

A. Armanini, M. Righetti and P. Grisenti

**Transportational cyclic steps created by flow over an erodible bed. Part 1. Experiments**

K. Taki and G. Parker

**Transportational cyclic steps created by flow over an erodible bed. Part 2. Theory and numerical simulation**

T. Sun and G. Parker

**Backwater of arch bridges under free and submerged conditions**

J. P. Martín-Vide and J. M. Prió

**Bubbles and waves description of self-aerated spillway flow**

S. C. Wilhelms and J. S. Gulliver

**Gas transfer, cavitation, and bulking in self-aerated spillway flow**

S. C. Wilhelms and J. S. Gulliver

**Experimental study of transition and skimming flows on stepped spillways in RCC dams: qualitative analysis and pressure measurements**

M. Sanchez-Juny and J. Dolz

**Effect on turbulence production due to sudden change in flow regimes**

I. M. Khan, R. R. Simons and A. J. Grass

**Probabilistic leak detection in pipelines using the mass imbalance approach**

J. Rougier

**Erosion of sand beds by obliquely impinging plane turbulent air jets**

K. A. Mazurek and N. Rajaratnam

**On optimal model complexity in inverse modeling of heterogeneous aquifers**

A. Mantoglou

**Discussion. The mean characteristics of horseshoe vortex at a cylindrical pier**

By M. Muzzammil and T. Gangadhariah  
*Journal of Hydraulic Research*, 2003, **41**, No. 3, 285–297  
Discussers: J. Unger and W. H. Hager; Reply by M. Muzzammil and T. Gangadhariah

**Discussion. Relation of surface roller eddy formation and surface fluctuation in hydraulic jumps**

By K. M. Mok  
*Journal of Hydraulic Research*, 2004, **42**, No. 2, 207–212  
Discusser: M. Mossa; reply by M. Mok

43, No. 6

**Numerical simulations of the behavior of alternate bars with different bank strengths**

C.-L. Jang and Y. Shimizu

**Modeling downstream fining in sand-bed rivers. I: Formulation**

S. Wright and G. Parker

**Modeling downstream fining in sand-bed rivers. II: Application**

S. Wright and G. Parker

**Low-Reynolds-number two-equation turbulence modelling for open channel flow: development and evaluation of free surface boundary conditions on the dissipation rate equation**

M. A. Cotton, D. Reedha and P. K. Stansby

**Numerical examination on the secondary-current effect for contaminant transport in curved channel**

T.-Y. Hsieh and J.-C. Yang

**Supercritical flow in sewer manholes**

W. H. Hager and C. Gissonni

**Combined optimization of pipes and control valves in water distribution networks.**

G. Pezzinga and G. Pititto

**Extended-period modeling of water pipe networks—a new approach**

J. E. Van Zyl, D. A. Savic and G. A. Walters

**Impingement of circular turbulent jets on rough boundaries**

N. Rajaratnam and K. A. Mazurek

**A new method for calculating depth of scour pit caused by overflow water jets**

P. Liu

**Experimental study on the upstream water level rise and downstream scour length of a submerged dam**

Z. Chen, X. Shao and J. Zhang

**The effects of sediment on earthquake response of concrete gravity dams to asynchronous ground motion**

A. Bayraktar, M. Akkose and Suleyman Adanur

**Free overfall from circular channels with flat base**

S. Dey

**Discussion. Darcy and post-Darcy flows within different sands**

By I. Wahyudi, A. Montillet and A. O. A. Khalifa

*Journal of Hydraulic Research*, 2002, **40**, No. 4, 519–525

Discusser: D. Hansen; Reply by I. Wahyudi, A. Montillet and A. O. A. Khalifa

**Discussion. A two-dimensional conservative finite-difference model in nonorthogonal coordinate system**

By C.-W. Kim, T.-Hoonyoon, Y.-S. Cho and S.-T. Kim

*Journal of Hydraulic Research*, 2003, **41**, No. 4, 395–403

Discusser: C. B. Singh and N. Prasad; Reply by C.-W. Kim, T.-Hoonyoon, Y.-S. Cho and S.-T. Kim
