

From *Journal of Hydraulic Research*, vol. 44

44, No. 1

Means of noise reduction in acoustic turbulence measurements

K. Blanckaert and U. Lemmin

Three-dimensional k - ϵ numerical modelling of overbank flow in a mobile bed meandering channel with floodplains of different depth, roughness and planform

P. R. Wormleaton and M. Ewunetu

3D flow field in a scour hole at a wing-wall abutment

S. Dey and A. K. Barbhuiya

Hydraulics of skimming flows on stepped chutes: The effects of inflow conditions?

H. Chanson

Estimation of scour below spillways using neural networks

H. Md. Azmathullah, M. C. Deo and P. B. Deolalikar

2D Numerical model of particle-bed collision in fluid-particle flows over bed

N. Lukerchenko, Z. Chara and P. Vlasak

NEWFLUME: a numerical water flume for two-dimensional turbulent free surface flows

P. Lin and W. Xu

Prediction of instantaneous bottom shear stress for smooth turbulent bottom boundary layers under irregular waves

H. Tanaka and M. Ataus Samad

A linear method to evaluate energy fluxes in a wave flume

M. Sanchez and C. Chevalier

Study of air and water supply to old ironwork of Teixois-Taramundi (Asturias), Spain

J. Fernández, E. Blanco and J. L. Parrondo

Simulation of unsteady flow and runner rotation during shut-down of an axial water turbine

T. Kolšek, J. Duhovnik and A. Bergant

Mixing layer oscillations for a submerged horizontal wall-jet

L. H. C. Chua and E. B. Shuy

Discussion: Application of gradually varied flow algorithms to simulate buried streams

By R. Bari and D. Hansen

Journal of Hydraulic Research, 2002, 40, No. 6, 674–683

Discussers: J. Bazargan and S. M. Shoaie

Book review. Fluvial, Environmental and Coastal Developments in Hydraulic Engineering

By M. Mossa, Y. Yasuda, and H. Chanson

Reviewers: W. H. Hager and R. M. Boes

44, No. 2

An analysis of 2004 Sumatra earthquake fault plane mechanisms and Indian Ocean tsunami

X. Wang and P. L.-F. Liu

An experimental study of the turbulence statistics in a lagoon

F. Cioffi, F. Gallerano and G. Troiani

Wind-induced chaotic advection in shallow flow geometries. Part I: Circular basins

Q. Liang, A. G. L. Borthwick and P. H. Taylor

Wind-induced chaotic advection in shallow flow geometries. Part II: Non-circular basins

Q. Liang, A. G. L. Borthwick and P. H. Taylor

Flow resistance of *Posidonia oceanica* in shallow water

G. Ciraolo, G. B. Ferreri and G. La Loggia

Numerical investigations of mean flow and turbulence structures of partly-vegetated open-channel flows using the Reynolds stress model

S.-U. Choi and H. Kang

Interaction of vertical round turbulent buoyant jets—Part I: Entrainment restriction approach

P. C. Yannopoulos and G. C. Noutsopoulos

Interaction of vertical round turbulent buoyant jets—Part II: Superposition method

P. C. Yannopoulos and G. C. Noutsopoulos

Unsteadiness and viscous losses in hydraulic turbines

M. J. Cervantes and L. H. Gustavsson

Numerical experiments of flow and transport in a variable-aperture fracture subject to effective normal stresses

W.-C. Jeong, D. Bruel and Y.-S. Cho

Soft computing-based nonlinear fusion algorithms for describing non-Darcy flow in porous media

A.-R. Nazemi, S. M. Hosseini and M.-R. Akbarzadeh-T

Experimental procedure and database for non-Newtonian open channel flow

R. Haldenwang and P. Slatter

44, No. 3

Dam Removal Express Assessment Models (DREAM). Part 1: Model development and validation

Y. Cui, G. Parker, C. Braudrick, W. E. Dietrich and B. Cluer

Dam Removal Express Assessment Models (DREAM). Part 2: Sample runs/sensitivity tests

Y. Cui, C. Braudrick, W. E. Dietrich, B. Cluer and G. Parker

Modeling descending carbon dioxide injections in the ocean

E. J. Wannamaker and E. E. Adams

Simulation of breaking wave by SPH method coupled with $k-\epsilon$ model

S. Shao

Analysis of transverse mixing in natural streams under slug tests

I. W. Seo, K. O. Baek and T. M. Jeon

Simulating sine-generated meandering channel evolution with an analytical model

D. Chen and J. D. Duan

On three-dimensional continuous saltating process of sediment particles near the channel bed

H.-Y. Lee, Y.-T. Lin, J.-Y. You and H.-W. Wang

Models for effective density and settling velocity of flocs

A. Khelifa and P. S. Hill

A third-order explicit central scheme for open channel flow simulations

M. Venutelli

Unsaturated subsoil erosion protection in turbulent flow conditions

M. Davis, H. J. Köhler and M. A. Koenders

Characteristics of a hydraulic jump in Bingham fluid

J.-J. Shu and J. G. Zhou

Discussion: Exact solutions for normal depth problem

By P. K. Swamee and P. N. Rathie

Journal of Hydraulic Research, 2004, 42, No. 5, 541–547

Discusser: R. Srivastava

44, No. 4

Vortex trajectory hysteresis above self-formed vortex ripples

D. Admiraal, R. Musalem-Jara, M. García and Y. Niño

2D-V hydrodynamics of wave-floating breakwater interaction

T. H. Koftis, P. Prinos and E. Koutandos

Pollutant dispersion in water currents under wind action

A. N. Menéndez and Carlos E. Laciana

Linear stability analysis of a 1-D model with dynamical description of bed-load transport

C. Di Cristo, M. Iervolino and A. Vacca

Analysis and prediction of riverbed changes using empirical orthogonal functions

T.-W. Hsu, C.-D. Jan, K.-C. Chang and S.-K. Wang

Scour holes downstream of bed sills in low-gradient channels

M. Ben Meftah and M. Mossa

Turbulent flow and bed pressure within headcut scour holes due to plane reattached jets

S. J. Bennett and C. V. Alonso

Experimental analysis of the impact of dry avalanches on structures and implication for debris flows

B. Zanuttigh and A. Lamberti

Outflow calibration for vertically distorted models of thermally stratified reservoirs

R. Ettema, M. Muste, A. J. Odgaard and O. Abaci

Kinematic assessment of floc formation using a Monte Carlo model

A. Khelifa and P. S. Hill

An experimental study of sand deposition from sediment laden water jets

N. Rajaratnam and K. A. Mazurek

Hydraulic jump in circular and U-shaped channels

A. Bushra and N. Afzal

44, No. 5

14th IAHR Arthur Thomas Ippen Award On why and how do rivers meander

A. M. Ferreira Da Silva

Modelling of submerged vanes

C. Flokstra

Sediment discharge prediction in meandering compound channels

R. D. Karamisheva, J. F. Lyness, W. R. C. Myers and J. O'Sullivan

Prediction of alluvial river bed variation by SDAR model

F. Bahadori, A. Ardeshtir and A. Tahershamsi

Application of surface-based bed load transport equations to a desert gravel-bed stream

J. Duan, L. Chen and S. Scott

The response of turbidity currents to a canyon-fan transition: internal hydraulic jumps and depositional signatures

S. Kostic and G. Parker

A probabilistic approach to the analysis of contraction scour

L. Brandimarte, P. D'Odorico and A. Montanari

Scour due to a horizontal turbulent jet: Numerical and experimental investigation

C. Adduce and G. Sciortino

A modelling and 3-D simulation system for water erosion on hillslopes

D. Shen and K. Takara

Investigation of turbulence behavior in pipe transient using a $k-\epsilon$ model

M. Zhao and M. S. Ghidaoui

Experimental verification of the frequency response method for pipeline leak detection

P. J. Lee, M. F. Lambert, A. R. Simpson, J. P. Vitkožský and J. Liggett

Velocity distribution over cylindrical weirs

M. Heidarpour and M. R. Chamani

Discussion: Pressure transients and energy dissipation in liquid-liquid impacts

By G. Wolters and G. Mullerv

Journal of Hydraulic Research, 2004, 42, No. 4, 440–445

Discussor: B. B. Sharp

Discussion: Exact solutions for normal depth problem

By P. K. Swamee and P. N. Rathie

Journal of Hydraulic Research, 2004, 42, No. 5, 541–548

Discussors: B. Achour and A. Bedjaoui

Discussion: Distributions of velocity, turbulence, and suspended sediment over low relief-antidunes

By D. G. Wren, S. J. Bennett, B. D. Barkdoll and R. A. Kuhnle

Journal of Hydraulic Research, 2005, 43, No. 1, 3–1

Discussors: P. Wu and Y.-C. Jin

44, No. 6

Editorial

W. H. Hager

Bed roughness induced entrainment in a high Richardson number underflow

R. L. Fernández and J. Imberger

1-D modelling of conveyance, boundary shear and sediment transport in overbank flow

S. Atabay and D. W. Knight

An explicit two-dimensional finite element model to simulate short- and long-term bed evolution in alluvial rivers

R. García-Martínez, R. Espinoza, E. Valera and M. González

Discharge prediction in compound channels by end depth method

S. Dey and M. F. Lambert

Computation of flow velocity in rough channels

D. Termini and M. Greco

Depth-integrated flow modelling taking into account bottom curvature

B. J. Dewals, S. Erpicum, P. Archambeau, S. Detrembleur and M. Pirotton

Experimental analysis of the segregation of dry avalanches and implications for debris flows

B. Zanuttigh and A. Di Paolo

Oblique impingement of circular water jets on a plane boundary

A. Jalil and N. Rajaratnam

A simple mathematical model to predict the particle size distribution of the armour layer

R. J. Garde, A. Sahay and S. Bhatnagar

Prediction of downpull on closing high head gates

I. Aydin, I. T. Telci and O. Dundar

Resistance coefficient in a smooth concentric annular pipe

M. Mossa

Prediction of contaminant plumes (shapes, spatial moments and macrodispersion) in aquifers with insufficient geological information

A. M. M. Elefki

Discussion: An experimental investigation of jet flow on a stepped chute

By M. K. El-Kamash, M. R. Loewen and N. Rajaratnam

Journal of Hydraulic Research, 2005, 43, No. 2, 31–43

Discussors: M. Takahashi, Y. Yasuda and I. Ohtsu
