

# Proceedings of the Institution of Civil Engineers 2000

## Structures and Buildings Vol. 140

### Subject index

Introducers of informal discussions are treated as authors

#### Beams & girders

- Design procedures for combined shear and patch loading of plate girders. Roberts T.M. and Shahabian F. Aug., 219–225
- Designing composite steel beams with precast concrete hollow-core slabs. Lam D., Elliott K.S. and Nethercot D.A. May, 139–149
- Experiments on composite steel beams with precast concrete hollow core floor slabs. Lam D., Elliott K.S. and Nethercot D.A. May, 127–138
- Non-planar beam–wall joints in tall building structures. Kwan A.K.H. and Chan W.T. Feb., 73–83
- Shear peeling of steel plates adhesively bonded to the sides of reinforced concrete beams. Mohamed Ali M.S., Oehlers D.J. and Bradford M.A. Aug., 249–259
- Strengthening reinforced concrete girders with ‘n’ and ‘T’ cross-sections. Haldane D. and Ziara M.M. Feb., 61–72
- Web buckling of tapered plate girders. Mirambell E. and Zárate A.V. Feb., 51–60

#### Bridges

- An energy approach for geometrically non-linear analysis of cable-stayed bridges. Xi Y. and Kuang J.S. Aug., 227–237
- Continuous precast concrete girder and slab bridge decks. Marí A.R. and Montaner J. Aug., 195–206
- Membrane action in plain concrete slabs under concentrated loading. Eyre J.R. Aug., 207–217
- Partially and non-destructive testing of 40 concrete bridges. Tajalli S.M.A. and Rigden S.R. Feb., 25–38
- Peeling failure of reinforced concrete beams with fibre-reinforced plastic or steel plates glued to their soffits. Raoof M. and Hassanen M.A.H. Aug., 291–305
- The behaviour of shear connections in a composite beam with a full-depth precast slab. Shim C.S., Kim J.H., Chang S.P. and Chung C.H. Feb., 101–110
- Thermal behaviour of composite box-girder bridges. Chang S.P. and Im C.K. May, 117–126

#### Buildings, structure & design

- Experiments on composite steel beams with precast concrete hollow core floor slabs. Lam D., Elliott K.S. and Nethercot D.A. May, 127–138
- Stress analysis of buildings under horizontal load. Part 1: Basic behaviour—deformations. Zalka K.A. May, 179–186

Stress analysis of buildings under horizontal load.

- Part 2: Load distribution. Zalka K.A. Aug., 261–275
- The new No. 1 court and Broadcast Centre: All England Lawn Tennis and Croquet Club, Wimbledon. Pike D. Nov., 339–344
- The Reebok Stadium. Douglas S.P. Nov., 333–338
- The response of grandstands to dynamic crowd loads. Ellis B.R., Ji T. and Littler J.D. Nov., 355–365
- Wall panel renaissance: tilt-up concrete construction. Glass J. Aug., 277–289

#### Cables & tendons

- An energy approach for geometrically non-linear analysis of cable-stayed bridges. Xi Y. and Kuang J.S. Aug., 227–237

#### Codes of practice & standards

- Design procedures for combined shear and patch loading of plate girders. Roberts T.M. and Shahabian F. Aug., 219–225
- Welded aluminium alloy connections: a simplified plastic model. Chan T.K. and Porter Goff R.F.D. May, 161–168

#### Columns

- Effective lengths of concrete-filled steel square hollow sections in fire. Bailey C. May, 169–178

#### Composite structures

- Designing composite steel beams with precast concrete hollow-core slabs. Lam D., Elliott K.S. and Nethercot D.A. May, 139–149
- Effective lengths of concrete-filled steel square hollow sections in fire. Bailey C. May, 169–178
- Experiments on composite steel beams with precast concrete hollow core floor slabs. Lam D., Elliott K.S. and Nethercot D.A. May, 127–138

#### Concrete structures

- A proposed empirical corrosion model for reinforced concrete. Roberts M.B., Atkins C., Hogg V. and Middleton C. Feb., 1–11
- A refined strut–tie model approach and its application tool. Yun Y.M. Feb., 13–24
- Continuous precast concrete girder and slab bridge decks. Marí A.R. and Montaner J. Aug., 195–206
- Control of reinforcement corrosion by surface treatment of concrete. Sergi G., Seneviratne A.M.G., Maleki M.T., Sadegzadeh M. and Page C.L. Feb., 85–100

- Croke Park redevelopment—stadium design in an urban context. Murray F.V. Nov., 345–353
- Membrane action in plain concrete slabs under concentrated loading. Eyre J.R. Aug., 207–217
- Partially and non-destructive testing of 40 concrete bridges. Tajalli S.M.A. and Rigden S.R. Feb., 25–38
- Peeling failure of reinforced concrete beams with fibre-reinforced plastic or steel plates glued to their soffits. Raoof M. and Hassanen M.A.H. Aug., 291–305
- Reliability assessment of deteriorating reinforced concrete beams. Sarveswaran V., Roberts M.B. and Ward J.A. Aug., 239–247
- Shear peeling of steel plates adhesively bonded to the sides of reinforced concrete beams. Mohamed Ali M.S., Oehlers D.J. and Bradford M.A. Aug., 249–259
- Stadium Australia: for 2000 Olympics. Morley S., King A. and Ashfield M. Nov., 307–314
- Strengthening reinforced concrete girders with ‘n’ and ‘T’ cross-sections. Haldane D. and Ziara M.M. Feb., 61–72
- The Amsterdam Arena: a multi-functional stadium. Mans I.D.G. and Rodenburg J. Nov., 323–331
- Wall panel renaissance: tilt-up concrete construction. Glass J. Aug., 277–289

# Corrosion

- A proposed empirical corrosion model for reinforced concrete. Roberts M.B., Atkins C., Hogg V. and Middleton C. Feb., 1–11
- Control of reinforcement corrosion by surface treatment of concrete. Sergi G., Seneviratne A.M.G., Maleki M.T., Sadegzadeh M. and Page C.L. Feb., 85–100
- Reliability assessment of deteriorating reinforced concrete beams. Sarveswaran V., Roberts M.B. and Ward J.A. Aug., 239–247

# Design methods & aids

- A refined strut–tie model approach and its application tool. Yun Y.M. Feb., 13–24
- Stress analysis of buildings under horizontal load. Part 1: Basic behaviour—deformations. Zalka K.A. May, 179–186
- Stress analysis of buildings under horizontal load. Part 2: Load distribution. Zalka K.A. Aug., 261–275

# Dynamics

- Wind effects on a very tall building and wavelet analysis. Fang J.Q., Li Q.S., Jeary A.P. and Wong C.K. May, 151–159

# Environment

- Thermal behaviour of composite box-girder bridges. Chang S.P. and Im C.K. May, 117–126

# Fatigue

- The behaviour of shear connections in a composite beam with a full-depth precast slab. Shim C.S., Kim J.H., Chang S.P. and Chung C.H. Feb., 101–110

# Field testing & monitoring

- Partially and non-destructive testing of 40 concrete bridges. Tajalli S.M.A. and Rigden S.R. Feb., 25–38

# Maintenance & inspection

- Partially and non-destructive testing of 40 concrete bridges. Tajalli S.M.A. and Rigden S.R. Feb., 25–38

- Peeling failure of reinforced concrete beams with fibre-reinforced plastic or steel plates glued to their soffits. Raoof M. and Hassanen M.A.H. Aug., 291–305

# Materials technology

- A proposed empirical corrosion model for reinforced concrete. Roberts M.B., Atkins C., Hogg V. and Middleton C. Feb., 1–11

# Mathematical modelling

- Welded aluminium alloy connections: a simplified plastic model. Chan T.K. and Porter Goff R.F.D. May, 161–168

# Recreational facilities

- Croke Park redevelopment—stadium design in an urban context. Murray F.V. Nov., 345–353
- The Reebok Stadium. Douglas S.P. Nov., 333–338
- The response of grandstands to dynamic crowd loads. Ellis B.R., Ji T. and Littler J.D. Nov., 355–365

# Rehabilitation, reclamation & renovation

- Shear peeling of steel plates adhesively bonded to the sides of reinforced concrete beams. Mohamed Ali M.S., Oehlers D.J. and Bradford M.A. Aug., 249–259
- Strengthening reinforced concrete girders with ‘n’ and ‘T’ cross-sections. Haldane D. and Ziara M.M. Feb., 61–72

# Research & development

- Continuous precast concrete girder and slab bridge decks. Marí A.R. and Montaner J. Aug., 195–206
- Wall panel renaissance: tilt-up concrete construction. Glass J. Aug., 277–289

# Risk & probability analysis

- Reliability assessment of deteriorating reinforced concrete beams. Sarveswaran V., Roberts M.B. and Ward J.A. Aug., 239–247

# Slabs & plates

- Designing composite steel beams with precast concrete hollow-core slabs. Lam D., Elliott K.S. and Nethercot D.A. May, 139–149
- Membrane action in plain concrete slabs under concentrated loading. Eyre J.R. Aug., 207–217
- The Amsterdam Arena: a multi-functional stadium. Mans I.D.G. and Rodenburg J. Nov., 323–331

# Statistical analysis

- Wind effects on a very tall building and wavelet analysis. Fang J.Q., Li Q.S., Jeary A.P. and Wong C.K. May, 151–159

# Steel structures

- Croke Park redevelopment—stadium design in an urban context. Murray F.V. Nov., 345–353
- Design procedures for combined shear and patch loading of plate girders. Roberts T.M. and Shahabian F. Aug., 219–225
- Manchester United FC new North Stand. Gannon P. Nov., 315–322
- Stadium Australia: for 2000 Olympics. Morley S., King A. and Ashfield M. Nov., 307–314
- The Amsterdam Arena: a multi-functional stadium. Mans I.D.G. and Rodenburg J. Nov., 323–331
- The new No. 1 court and Broadcast Centre: All England Lawn Tennis and Croquet Club, Wimbledon. Pike D. Nov., 339–344

The Reebok Stadium. Douglas S.P. Nov., 333–338  
 Web buckling of tapered plate girders. Mirambell E.  
 and Zárate A.V. Feb., 51–60

### Strength & testing of materials

Masonry crack damage: its origins, diagnosis,  
 philosophy and a basis for repair. Cook D.A.,  
 Ledbetter S., Ring S. and Wenzel F. Feb., 39–50  
 The behaviour of shear connections in a composite  
 beam with a full-depth precast slab. Shim C.S.,  
 Kim J.H., Chang S.P. and Chung C.H. Feb., 101–  
 110  
 Welded aluminium alloy connections: a simplified  
 plastic model. Chan T.K. and Porter Goff R.F.D.  
 May, 161–168

### Stress analysis

Stress analysis of buildings under horizontal load.  
 Part 1: Basic behaviour—deformations. Zalka K.A.  
 May, 179–186  
 Stress analysis of buildings under horizontal load.  
 Part 2: Load distribution. Zalka K.A. Aug., 261–  
 275

### Structural frameworks

Manchester United FC new North Stand. Gannon P.  
 Nov., 315–322  
 The new No. 1 court and Broadcast Centre: All  
 England Lawn Tennis and Croquet Club,  
 Wimbledon. Pike D. Nov., 339–344

### Subsidence

Masonry crack damage: its origins, diagnosis,  
 philosophy and a basis for repair. Cook D.A.,  
 Ledbetter S., Ring S. and Wenzel F. Feb., 39–50

### Thermal effects

Effective lengths of concrete-filled steel square  
 hollow sections in fire. Bailey C. May, 169–178  
 Thermal behaviour of composite box-girder bridges.  
 Chang S.P. and Im C.K. May, 117–126

### Wind loading & aerodynamics

Manchester United FC new North Stand. Gannon P.  
 Nov., 315–322  
 Wind effects on a very tall building and wavelet  
 analysis. Fang J.Q., Li Q.S., Jeary A.P. and Wong  
 C.K. May, 151–159
