

Structural Concrete vol. 2

Author index

Baets R. see Moerman W.

Bartos P. J. M. and Cechura J.

Improvement of working environment in concrete construction by the use of self-compacting concrete. Sept., 127–132

Bergmeister K. and Santa U.

Global monitoring concepts bridges. Mar., 29–39

Breen J. E.

Practical design in structural concrete: American and European practice. Mar., 21–28

Calvera J.

Comparison of Eurocode 2, Model Code 90 and ACI 318–99 with regard to shear and punching provisions for footings. Dec., 183–186

Carbone V. I., Giordano L. and Mancini G.

Design of RC membrane elements. Dec., 213–223

Chana P. and Moss R. M.

Re-engineering the design and construction processes for in situ concrete frames. June, 49–61

Cechura J. see Bartos P. J. M.

Degrieck J. see Moerman W.

De Castro San Roman J. see Favre R.

De Waele W. see Moerman W.

Elbadry M., Ghali A. and Megally S.

Deflection prediction for concrete bridges: analysis and field measurements on a long-span bridge. Mar., 1–14

Favre R. and De Castro San Roman J.

The arch: enduring and endearing. Dec., 187–200

Fragomeni S. and Mendis P. A.

A study of simplified design methods for plain concrete walls. Mar., 15–19

Ghali A. see Elbadry M.

Giordano L. see Carbone V. I.

Helland S.

Service life of concrete offshore structures. Sept., 121–125

Mancini G. see Carbone V. I.

Megally S. see Elbadry M.

Mendis P. A. see Fragomeni S.

Moerman W., Taerwe L., De Waele W., Degrieck J. and Baets R.

Application of optical fibre sensors for monitoring civil engineering structures. June, 63–71

Moss R. M. see Cechura J.

Noguchi T. and Tamura M.

Concrete design towards complete recycling. Sept., 155–167

Roberts J. E.

Performance of concrete bridges in recent earthquake. June, 73–91

Santa U. see Bergmeister K.

Schneider M. see Spanka G.

Sjöström C.

Approaches to sustainability building construction. Sept., 111–119

Spanka G. and Schneider M.

Release of inorganic and organic substances from cement bound materials. Sept., 145–153

Straatman R. and Vambersky J. N. J. A.

Precast construction and environment. June, 93–98

Sommerville G.

Codes of practice—role and content. June, 99–100

Vecchio F. J.

Nonlinear finite element analysis of reinforced concrete at the cross-roads?, Dec., 201–212

Taerwe L. see Moerman W.

Tamura M. see Noguchi T.

Vambersky J. N. J. A. see Straatman R.
