

Subject index

Bridges

An experimental investigation of a horseshoe vortex induced by a bridge pier. Muzzammil M., Gangadharaiah T. and Gupta G. Jun., 109–119

Coastal engineering

The influence of impinging jets on hydraulic jumps. Yüksel Y., Günel M., Bostan T., Çevik E. and Çelikoğlu Y. Jun., 63–76

Dams, barrages & reservoirs

Ladybower Dam: upgrading in a national park. Macdonald A., Harwood S. D. R. and Vaughan P. R. Mar., 13–20

Developing countries

Privatising urban water services in developing countries. Njiru C. Sept., 123–130

Multi-stage filtration for developing world surface water treatment. Clarke B. A., Jones C. J., Evans H. L., Crompton J. L., Dorea C. C. and Bertrand S. Sept., 143–149

A physico-chemical water treatment system for relief agencies. Clarke B. A., Crompton J. L. & Luff R. Dec., 211–216

Economics & finance

Privatising urban water services in developing countries. Njiru C. Sept., 123–130

Embankments

Performance of flood embankments in England and Wales. Dyer M. Dec., 177–186

Environment

Ladybower Dam: upgrading in a national park. Macdonald A., Harwood S. D. R. and Vaughan P. R. Mar., 13–20

Anaerobic treatment of sulphate-enriched wastewaters. Freese L. H. and Stuckey D. C. Dec., 187–195

Floods & floodworks

Flooding scenarios due to levee breaking in the Po river. Aureli F. and Mignosa P. Mar., 3–12

Conveyance of a managed vegetated two-stage river channel. Sellin R. H. J. and van Beesten. Mar., 21–33

Performance-based management of flood defence systems. Dawson R., Hall J. and Davis J. Mar., 35–44

Flood hydrographs in open channels. Graf W. H. and Qu Z. Mar., 45–52

Simple modelling of dam failure in a natural river. Macchione F. and Viggiani G. Mar., 53–60

Velocity distribution in non-prismatic compound channels. Bousmar D. and Zech Y. Jun., 99–108

Design guidelines for alternative formed suction inlets. Werth D. E. and Cheek D. E. Sept., 151–158

Modelling turbulent flow in two-stage meandering channels. Rameshwaran P. and Naden P. S. Sept., 159–173

Performance of flood embankments in England and Wales. Dyer M. Dec., 177–186

Geotechnical engineering

Performance of flood embankments in England and Wales. Dyer M. Dec., 177–186

Hydraulics & hydrodynamics

Conveyance of a managed vegetated two-stage river channel. Sellin R. H. J. and van Beesten. Mar., 21–33

Flood hydrographs in open channels. Graf W. H. and Qu Z. Mar., 45–52

Simple modelling of dam failure in a natural river. Macchione F. and Viggiani G. Mar., 53–60

The influence of impinging jets on hydraulic jumps. Yüksel Y., Günel M., Bostan T., Çevik E. and Çelikoğlu Y. Jun., 63–76

Clear water scour at abutments. Dey S. and Barbhuiya A. K. Jun., 77–97

Velocity distribution in non-prismatic compound channels. Bousmar D. and Zech Y. Jun., 99–108

An experimental investigation of a horseshoe vortex induced by a bridge pier. Muzzammil M., Gangadharaiah T. and Gupta G. Jun., 109–119

Methods for predicting dispersion coefficients in rivers. Wallis S. G. and Manson J. R. Sept., 131–141

Design guidelines for alternative formed suction inlets. Werth D. E. and Cheek D. E. Sept., 151–158

Modelling turbulent flow in two-stage meandering channels. Rameshwaran P. and Naden P. S. Sept., 159–173

Modelling wind-induced currents in water basins. Koçyigit M. B. and Falconer R. A. Dec., 197–210

Hydrology & water resources

Modelling wind-induced currents in water basins. Koçyigit M. B. and Falconer R. A. Dec., 197–210

Mathematical modelling

Flooding scenarios due to levee breaking in the Po river. Aureli F. and Mignosa P. Mar., 3–12

Simple modelling of dam failure in a natural river. Macchione F. and Viggiani G. Mar., 53–60

Velocity distribution in non-prismatic compound channels. Bousmar D. and Zech Y. Jun., 99–108

Methods for predicting dispersion coefficients in rivers. Wallis S. G. and Manson J. R. Sept., 131–141

Modelling turbulent flow in two-stage meandering channels. Rameshwaran P. and Naden P. S. Sept., 159–173

Modelling wind-induced currents in water basins. Koçyigit M. B. and Falconer R. A. Dec., 197–210

Models (physical)

An experimental investigation of a horseshoe vortex induced by a bridge pier. Muzzammil M., Gangadharaiah T. and Gupta G. Jun., 109–119

Design guidelines for alternative formed suction inlets. Werth D. E. and Cheek D. E. Sept., 151–158

Public health

Multi-stage filtration for developing world surface water treatment. Clarke B. A., Jones C. J., Evans H. L., Crompton J. L., Dorea C. C. and Bertrand S. Sept., 143–149

A physico-chemical water treatment system for relief agencies. Clarke B. A., Crompton J. L. & Luff R. Dec., 211–216

Risks & probability analysis

Performance-based management of flood defence systems. Dawson R., Hall J. and Davis J. Mar., 35–44

River engineering

Clear water scour at abutments. Dey S. and Barbhuiya A. K. Jun., 77–97

Methods for predicting dispersion coefficients in rivers. Wallis S. G. and Manson J. R. Sept., 131–141

Sea defences

The influence of impinging jets on hydraulic jumps. Yüksel Y., Günel M., Bostan T., Çevik E. and Çelikoğlu Y. Jun., 63–76

Sewage treatment & disposal

Anaerobic treatment of sulphate-enriched wastewaters. Freese L. H. and Stuckey D. C. Dec., 187–195

Water supply

Ladybower Dam: upgrading in a national park. Macdonald A., Harwood S. D. R. and Vaughan P. R. Mar., 13–20

Privatising urban water services in developing countries. Njiru C. Sept., 123–130

Multi-stage filtration for developing world surface water treatment. Clarke B. A., Jones C. J., Evans H. L., Crompton J. L., Dorea C. C. and Bertrand S. Sept., 143–149

A physico-chemical water treatment system for relief agencies. Clarke B. A., Crompton J. L. & Luff R. Dec., 211–216

Waste management & disposal

Anaerobic treatment of sulphate-enriched wastewaters. Freese L. H. and Stuckey D. C. Dec., 187–195

Waterways & canals

Flooding scenarios due to levee breaking in the Po river. Aureli F. and Mignosa P. Mar., 3–12

Flood hydrographs in open channels. Graf W. H. and Qu Z. Mar., 45–52

Clear water scour at abutments. Dey S. and Barbhuiya A. K. Jun., 77–97
